Ref.: **Regulation 30 read with Regulation 47 of SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015**

Dear Sir/ Ma'am,

Please find enclosed a copy of the Unaudited Standalone and Consolidated Financial Results of GMM Pfaudler Limited for the quarter ended June 30, 2026, published in Economic Times, Mumbai & Ahmedabad Edition and in Naya Padkar, Anand on August 6, 2026, for your records.

Kindly acknowledge receipt of the same.

Yours faithfully,

For **GMM Pfaudler Limited**

AS KEY RAW MATERIALS' PRICES RISE DUE TO WEST ASIA CONFLICT...

Fertiliser Production, Imports Dip

NP/NPK fertiliser production falls 28% and inbound shipments slip 48.5%

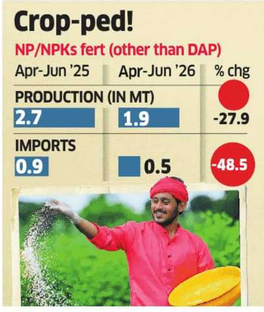
Shambhavi Anand

New Delhi: India's production and imports of NP/NPK fertilisers fell sharply in the June quarter, as the West Asia conflict inflated prices of key raw materials, raising concerns over nutrient availability for the ongoing crop sowing season.

Production of these complex fertilisers fell 28% to 1,919,700 tonnes from 2,663,900 tonnes a year earlier, while imports slipped 48.5% to 491,000 tonnes from 954,000 tonnes, said industry officials, citing data from the Fertiliser Association of India (FAI). They said ammonia and sulphur prices have nearly doubled, making manufacturing and imports less viable.

"A sharp spike in key raw material prices have made import and production of complexes unviable," said a senior executive at a top fertiliser producer, highlighting companies have already raised prices, but further increases would make these fertilisers unaffordable for farmers.

Unlike urea and di-ammonium phosphate (DAP), retail prices of NP and NPK fertilisers aren't regulated by the government. Instead, manufacturers are compensated under the nutrient based subsidy (NBS) scheme, under which the government fixes subsidies for individual nutrients, while companies determine the maximum retail price.



Industry executives said the subsidy rates, last revised in April 2026 prior to escalation of the West Asia conflict, no longer reflect the current raw material prices. As a result, both domestic production and imports have become less viable, affecting the supply of fertilisers widely used for pulses, oilseeds, cotton and maize.

In April, the government approved a 10-21% increase in nutrient subsidy rates for the 2026 kharif season, taking total subsidy outlay to ₹41,534 crore. However, fertiliser manufacturers say the revision has been overtaken by subsequent increases in global input costs.

The landed price of ammonia nearly doubled to around $900 per tonne, from $400-500 per tonne prior to the war, before easing slightly.

Sulphur prices climbed to $1,000-1,100 per tonne from about $550 per tonne, while the import price of phosphoric acid rose steadily to $1,700 per tonne for the current quarter, from $1,290 per tonne in the March quarter.

"Prices of sulphur are unlikely to go down in the next few months," said another senior executive, pointing out that it's a by-product during petroleum manufacturing, which has been severely impacted due to the conflict.

Ammonia production has been disrupted by continued Ukrainian attacks on Russian manufacturing units, squeezing global supplies.

Companies warned that unless the government further revises subsidy rates to reflect the higher costs, supply of complex fertilisers could remain under pressure during the peak sowing season, potentially affecting balanced nutrient application and crop productivity.

Samsung, SK Hynix Look at Beijing for Chipmaking Tools

Samsung Electronics and SK Hynix are evaluating chipmaking equipment from China's Advanced Micro-Fabrication Equipment (AMEC) for possible use at their Chinese factories, three people familiar with the matter said, as the South Korean firms hedge against the risk of tighter US export controls. The memory chipmakers began testing AMEC etching equipment about two years ago, when uncertainty was mounting over whether Washington would continue allowing them to import US chipmaking tools into China, two of the sources said. —Reuters

Curbing Imports

▸▸ From Page 1

While the country has demonstrated it can build launch vehicles and satellites, many mission-critical technologies and specialised components continue to be imported, inflating costs and stretching procurement timelines.

"As much as we would like to invest in another rocket company, we are going to be rigorously looking at the supply chain and focus on where we can help smooth those bottlenecks," Vamsi Kora, founder and managing partner at Abyro Capital, told **ET**.

He emphasised that many startups struggle since critical subsystems are either unavailable or difficult to manufacture at the required quality and scale.

Investors see this scenario as an opportunity—startups that can build these capabilities locally stand to benefit not only from rising domestic demand as launches increase, but also by becoming suppliers to the global space and defence industry.

The investment thesis is already starting to reflect in funding traction in just the past 7-8 months. Bengaluru-based satellite propulsion startup Bellatrix Aerospace raised $20 million earlier this year, Hyderabad-based TakeMe2Space secured $5 million, orbital mobility startup Aule Space raised $2 million, while space surveillance company Digantara closed a $50-million Series B round. Aerospace electronics firm CoreEL Technologies raised $30 million to expand its advanced systems business.

TakeMe2Space, whose PowerBank-50 recently became India's first flight-proven commercial satellite battery, said it has already begun shipping to customers globally and is also seeing a lot of investor interest. "Several sensors and actuators are not built in India," said Anand Rajagopalan, cofounder. "In fact, even world over, there are like half a dozen companies building such sensors that we are doing. So, there's a lot of interest from investors."

It's not just Abyro. "Some of the components and subsystems are very much of interest to us," said Vishnu Rajeev, investment partner at Speciale Invest, pointing to propulsion systems, material innovation; positioning, navigation and timing (PNT), microgravity services, and space defence as emerging themes. The firm has also backed startups including VyomIC, AstroGate Labs, and Inspecity in these areas.

Pavestone VC is betting on the same trend. "Component manufacturing requires high-tech precision," said Srikanth Tanikella, managing partner.

India has been Among the Fastest-growing Markets

▸▸ From Page 1

The chain, operating under Sahrudaya HealthCare (SHPL), scaled by acquiring below-the-radar distressed assets and was planning a local initial public offering before the parent decided to cash out, a move that raised several eyebrows.

India has been one of the fastest-growing markets for the Swedish chain, with its high-teens revenue growth fuelled by rapid hospital expansion, outpacing group's 16.7% organic rate in 2024. Medicover also has a presence in central and eastern Europe and West Asia.

The Indian network, which includes women and children's hospitals and cancer institutes, is supported by more than 1,250 doctors and provides multispeciality and superspeciality care across a wide range of clinical disciplines.

The nearly three-decade-old Swedish chain entered India in 2017, the same year it got listed on Nasdaq Stockholm, acquiring a controlling stake in Hyderabad-based Sahrudaya Healthcare, the operator of the MaxCure hospital chain.

Abc Medicover Holdings BV holds about a 66.9% stake in the Indian operations, as per data intelligence firm Tracxn. The rest is owned by a team of founding doctors of Sahrudaya Healthcare led by Gundana and the company's senior management.

Medicover India's holding company, SHPL, posted a 13% increase in revenue to $217.25 million in FY25, despite a moderation in occupancy levels. It generated Ebitda of $25.68 million, translating into an Ebitda margin of 11.82%. However, despite the positive operating performance, the company reported a net loss of $23.69 million, according to Tracxn.

The top two specialities, cardiology and neurology, accounted for 34% of inpatient revenue in FY25. The chain plans to further diversify its speciality mix with departments such as oncology to its existing and new hospitals, said a recent ICRA report.

There are continued net losses and an increase in debt levels, on account of the incipient stage of operations of the newer hospitals amid the sizeable capacity expansions in the past four years, which impacted SHPL's net worth and resulted in modest debt protection metrics, added the report.

According to industry insiders, SHPL is projecting around ₹400 crore in Ebitda for FY27, which is expected to jump to ₹600 crore in a year's time as capacity expansions and new assets will start generating revenue. India has been contributing 10-11% to the parent's global revenue but drives a big chunk of volumes, or patient footfall.

The international chain invested about ₹2,000 crore over the last seven years in the Indian network. The business had ₹2,264.5 crore of debt as of September 30, 2025, mostly external commercial borrowings from the parent.

Medicover expanded significantly in India last year. It opened a new 300-bed hospital in Secunderabad, Telangana, transforming an old site into a modern medical facility. Medicover Hospitals Navi Mumbai launched the city's first advanced trauma centre, according to the group's latest annual report. Another hospital opening was planned for this year.

The int'l chain invested about ₹2,000 crore over the last seven years in the Indian network

Kotak Mahindra and Rothschild are advising on this transaction.

KKR BIG BETS

Reuters in June was the first to report KKR's discussions with Sweden's Medicover for a $1 billion investment to acquire a majority stake in the Indian operations.

Nearly four years after exiting Max Healthcare with a fivefold return, KKR has been aggressively scouting for hospital investments in India. It has been building a healthcare platform in the south through Baby Memorial Hospital, signalling a renewed strategy of acquiring regional hospital chains.

In 2025, KKR took a bet on India's oncology care sector by acquiring a controlling stake in Healthcare Global Enterprises from founder BS Ajaikumar and other shareholders like CVC Capital Partners.

ROLLBACK CALLS Street vents ire at unpredictability of moves; Sebi rules out system changes but will meet top brokers

Traders Yet to Figure Out CAS, Losses Rise

Nishanth Vasudevan & Kairavi Lukka

Mumbai: The newly introduced closing auction system (CAS) has drawn sharp criticism from traders, who are irked by the unpredictability of recent index and stock price moves and the resulting losses.

Calls for changes to the mechanism or, even a temporary rollback, have gathered pace on social media, prompting the Securities and Exchange Board of India (Sebi) and exchanges to convene a meeting with top brokers even as the authorities defended the framework.

The regulator is believed to have told brokers that it has no plans to change the CAS for now and urged them to encourage more traders to participate in the mechanism. An email sent to Sebi went unanswered till the time of going to print.

At the centre of the controversy is the regulator's decision to overhaul the way closing prices of 200-odd stocks in the futures and options (F&O) segment are determined, which traders say has caused unusually wide divergences between Sensex and Nifty and futures and options trades going awry.

"The biggest problem under the CAS is that traders are unable to understand what the closing prices will be because there is a lot of randomness in the system," said Piyush Chaudhry, founder of Mumbai-based Wave Analytics.

Professional traders use factors such as order flows, liquidity, derivatives positions and historical trading patterns to estimate price directions—key to successful trading. Sharp deviations from those expectations can cause trading strategies to misfire, resulting in unexpected gains or losses.

Options traders have taken the biggest hit in the closing auction system. For traders like Aakanksha Gupta, the closing auction mechanism has put her in a blind spot as she is unable to assess where the Nifty is likely to close.

"As an options seller, I rely on the live Nifty spot level to execute trades throughout the day. Since CAS was introduced, cash market trading ends at 3.15 pm, but the F&O eligible stocks continue to trade," said Mumbai-based Gupta, a Sebi-registered research analyst. "We build strategies around the prevailing spot level, only to find the index repricing sharply when trading resumes, turning profitable positions into losses.

Both indices have witnessed rollercoaster rides in the past three days. On Wednesday, the Sensex was down 0.2% and the Nifty had fallen 0.5% at their intraday lows. At close, the Sensex ended 0.19% higher, while the Nifty closed almost flat.

"Over the past two days, we've seen a significant gap between the reference price during the CAS and the final indicative closing price, because large orders can influence the indicative price," said Aditya Pachwaria, founder, Fintoric Capital.

WILD SWINGS

Shikha Pruthi Gupta, a Faridabad, NCR-based full-time trader, said a profitable trade at 3.15 pm can unexpectedly turn into a loss because of the lack of visibility into where the index will finally settle.

One key criticism voiced by traders is the 3% price band within which the auction price is generally allowed to move, measured on the basis of the stock's average traded price between 3.00 and 3.15 pm.

"How can you have a +/-3% range for stock prices in the auction process; that itself is a random number and has no connection to what the market's behaviour was for the day," said Chaudhry. "This methodology is highly questionable and has no statistical basis."

Algorithmic trading has been among the biggest casualties of the new mechanism, with professional traders saying their models have struggled to anticipate the sharp and unexpected price moves seen over the past three days. This is because many algorithms were designed around historical closing price patterns rather than an auction-driven market close.

HDFC BANK CEO CLARIFIES AT AGM

'No US Lawsuits Filed Yet, Ready to Defend on Facts if Needed'

Chairman Kumar says bank fundamentally strong, poised for a new phase of growth

Our Bureau

Mumbai: HDFC Bank on Wednesday reiterated its strong governance credentials while telling shareholders that no US lawsuits have so far been filed against the country's most-valued lender following investigations announced by multiple overseas law firms.

"I think in the US, law firms often issue press releases in an effort to identify potential plaintiffs after a decline in the values of the share price," Chief Executive Sasidhar Jagdishan told shareholders at the bank's annual general meeting in Mumbai.

Thus far, no lawsuit has been filed, said Jagdishan, adding that if a lawsuit is filed, the bank is well positioned to defend on facts and intent.

GOVERNANCE ASSURANCE

HDFC Bank reiterated a zero-tolerance toward unethical practices and said to keep control functions empowered

His clarification comes as several US law firms announced investigations into HDFC Bank on behalf of investors following media reports related to alleged governance issues. Such law-firm probes typically seek to identify shareholders who may wish to participate in potential class-action litigation.

"Following the resignation of the former part-time chairman, the board engaged with both domestic and international external law firms, overseen by a special committee comprising independent directors. The findings were disclosed to the stock exchanges on June 26," said Rajiv Kumar, non-executive chairman, HDFC Bank.

Kumar replaced Chakraborty after the latter's abrupt resignation. "The bank is fundamentally strong, with a pristine balance sheet. There are no governance-related concerns at the systemic level," Kumar said, adding that the board is committed to ensuring that HDFC Bank operates from the pedestal of the highest levels of corporate governance.

He said the board would ensure that control functions remained fully empowered and reiterated a zero-tolerance approach toward unethical practices.

Apart from governance, Kumar said HDFC Bank was at the cusp of a new phase of growth after completing the integration with HDFC Limited. He said the bank expected net interest margins and CASA ratio to improve over the next two to three years.

He also said more than 95% of new-to-bank home loan customers now open savings accounts with HDFC Bank, which shows that the merger with HDFC Limited has already begun unlocking meaningful synergies.

SECOND-BIGGEST IPO OF THE YEAR

Manipal Health Lists at 11% Premium

Our Bureau

Mumbai: Shares of Manipal Health Enterprises (Manipal Hospitals) listed at a premium of up to an 11% over the initial public offer price of ₹590 on Wednesday.

The stock debuted at ₹652 on the NSE and at ₹655 on the BSE. It touched an intraday high of ₹675.80 on the NSE and ₹676.05 on the BSE before closing at ₹663.15 on the NSE and ₹666.70 on the BSE.

The company's market capitalisation was at ₹87,229.24 crore at close. The market value of one of the country's largest listed hospital chains was at ₹128,112 crore on Tuesday.

The ₹9,275-crore IPO, which was open for subscription from July 29 to July 31, was subscribed 4.92 times. Temasek-backed Manipal Health had fixed the price band at ₹560-590 per equity share.

It was the second-largest IPO this year after SBI Funds Management's ₹9,795-crore issue, which was subscribed 41.73 times.

The offering comprised a fresh issue of shares worth ₹8,000 crore and an offer for sale (OFS) of 2.16 crore equity shares, aggregating to ₹1,275.2 crore, by promoters and existing investors.

S&P 500, Dow Rise to All-Time High as Hormuz Talks Advance

Nasdaq 100 climbs 3.3% and crude oil sinks below $80 a barrel

Bloomberg

Hopes for an agreement to revive the Strait of Hormuz lifted stocks to all-time highs, bonds climbed and oil sank, with Wall Street's enthusiasm also fueled by a batch of solid corporate earnings.

Both the S&P 500 and the Dow Jones Industrial Average rose to records. The Nasdaq 100 jumped 3.3%. Chipmakers saw their best four-day rally since 2020. In late hours, SpaceX reported strong revenue. Advanced Micro Devices Inc's outlook failed to inspire. Brent crude fell below $80.

The prospect of an interim deal focused on the Strait of Hormuz appeared to be gaining traction, with Qatar saying a proposal had been drafted and both American and Iranian officials sounding hopeful about an agreement.

President Donald Trump discussed efforts to deescalate US-Iran tensions with Qatar's Emir Sheikh Tamim Bin Hamad Al-Thani, according to the Gulf state's government. Tehran is considering allowing European nations to remove mines from Hormuz, said diplomats familiar with the matter.

"Markets are reacting to the possibility that a reopening of the Strait of Hormuz could help normalize global oil supplies and reduce near-term energy price pressures," noted Tony Miano at Wells Fargo Investment Institute. "Lower oil prices can ease inflation concerns."

That said, inflation is unlikely to normalise overnight, Miano warned. Energy-related pressures may ease, but broader prices could remain sticky in the near term, limiting how far Treasury yields move lower, he concluded.

While Federal Reserve policymakers last week left rates unchanged, more officials have expressed support for a hike as the Iran war and an AI investment boom fuel inflationary worries.

શ્રી દ્વારકાધીશ બેઠક મંદિર આણંદ ખાતે લાલ ઘટાના હિંડોળાના દર્શન ?

સરકારી વિનયન અને વાણિજ્ય કોલેજ તારાપુર ખાતે ૨૨૨ નવા વિદ્યાર્થીઓનું ઉત્સાહભેર સ્વાગત કરાયું

સોજિત્રાના ધારાસભ્ય વિપુલભાઈ પટેલના હસ્તે વિદ્યાર્થીનીઓની ફીનો ચેક અર્પણ કરાયો

તારાપુર,તા.૦૫

તારાપુર ખાતે આવેલી સરકારી વિનયન અને વાણિજ્ય કોલેજમાં પ્રથમ વર્ષ બી.એ. તથા બી.કોમ.ના નવપ્રવેશિત વિદ્યાર્થીઓ માટે નપ્રવેશોત્સવ-૨૦૨૬'નુ આયોજન કરવામાં આવ્યુ હતુ. આ કાર્યક્રમમાં સોજિત્રા વિધાનસભા વિસ્તારના ધારાસભ્ય વિપુલભાઈ પટેલ અધ્યક્ષસ્થાને ઉપસ્થિત રહ્યા હતા.

તારાપુર તાલુકાના વિદ્યાર્થીઓને અગાઉ ઉચ્ચ અભ્યાસ માટે આણંદ, વલ્લભ વિદ્યાનગર, પેટલાદ કે ખંભાત સુધી લાંબા થવુ પડતુ હતુ. ધારાસભ્ય વિપુલભાઈ પટેલ દ્વારા રાજ્ય સરકારમાં કરાયેલી મજબૂત રજૂઆતોના પરિણામે ગત વર્ષથી તારાપુરમાં સરકારી કોલેજ કાર્યરત કરવામાં આવી છે, જેનાથી તારાપુર તાલુકાના વિદ્યાર્થીઓને મોટી રાહત મળી છે.

શરૂઆતના પ્રથમ વર્ષે (ગત વર્ષે) કોલેજમાં કુલ ૧૯૩ વિદ્યાર્થીઓ (૧૦૨ વિદ્યાર્થીનીઓ અને ૯૧ વિદ્યાર્થીઓ)એ પ્રવેશ મેળવ્યો હતો. જ્યારે ચાલુ વર્ષે બીજા વર્ષે પ્રવેશ મેળવનાર વિદ્યાર્થીઓની સંખ્યા વધીને સૌથી વધુ ૨૨૨ (૮૪ વિદ્યાર્થીનીઓ અને ૧૩૮ વિદ્યાર્થીઓ) પહોંચી છે.

અત્રે ઉલ્લેખનીય છે કે, દિકરીઓના શિક્ષણને વેગ આપવા માટે કોલેજની શરૂઆતમાં ધારાસભ્ય વિપુલભાઈ પટેલ દ્વારા તારાપુર કોલેજમાં એડમિશન લેતી તમામ વિદ્યાર્થીનીઓની ફી ભરવાની જાહેરાત કરાઈ હતી, પરંતુ સ્થાનિક એનઆરઆઈ દાતા શૈલેષભાઈ કાંતિભાઈ પટેલ દ્વારા ફી ભરવાની તૈયારી બતાવતા, કોલેજમાં અભ્યાસ કરતી તમામ વિદ્યાર્થીનીઓની શૈક્ષણિક ફી શૈલેષભાઈ પટેલ દ્વારા ભરવામાં આવી છે.

આ ફીનો ચેક ધારાસભ્ય વિપુલભાઈ પટેલના હસ્તે ઈન્ચાર્જ આચાર્ય ડો. નેહા ચૌહાણને અર્પણ કરવામાં આવ્યો હતો. (તસવીર :ધવલ બ્રહ્મભટ્ટ તારાપુર)
